If you are publishing a paper that you think would be of media value, please contact [Wendy Ellison](#), STFC Press Officer. She can help with press releases and publicity. If you get in touch with her before publication, she can also get material ready in advance for the day of publication.

*Also includes missed publications from previous months

2. News to Report

a. UK hosts the first HIE-ISOLDE Physics Workshop

The permanent experimental collaborations that occupy each of the three HIE-ISOLDE beam lines, Miniball, ISOLDE Solenoidal Spectrometer (ISS) and Scattering Experiments Chamber (SEC), came together to host the first joint HIE-ISOLDE physics workshop last month at the IOP Headquarters in London. Throughout the 3 days, 50 people joined the in-person event, with presentations on recent results and the status of fresh experimental data since the restart of physics in 2021.

The workshop was supported by the IOP Nuclear Physics Group, Micron Semiconductors, and STFC, which allowed a fee waiver for PhD students who could present their work and have the opportunity to integrate with the wider community at HIE-ISOLDE. The success of the event resulted in discussions about continuing this

collaborative format in the future on a biennial basis, with the next host country yet to be decided.

The talks from the workshop can be found on the Indico page:

Contribution from Liam Gaffney (University of Liverpool) and David Sharp (University of Manchester)

b. York NPG interviewed about research impact

The University of York's Nuclear Physics Group was recently interviewed by STFC to talk about research impact. Dr Stefanos Paschalis (pictured), Prof David Jenkins, and Dr Pankaj Joshi spoke about the success they had partnering with Kromek to create handheld gamma ray detectors for nuclear security.
